

Appl. No. : 99/309,366
Filed : May 11, 1999

22. The method of Claim 21, additionally comprising:
selecting one of the items of observational information; and
displaying the graphical representation of the physical object.
23. The method of Claim 21, additionally comprising:
selecting one of the items of observational information; and
displaying the selected item of observational information.
24. The method of Claim 21, additionally comprising assigning a defect code to the
item of observational information.
25. The method of Claim 21, wherein the physical object is a building.
26. The method of Claim 21, wherein the object identifier is a bar code number.
27. The method of Claim 21, wherein the graphical representation is a floor plan
schematic.
28. The method of Claim 21, wherein the item of observational information includes a
textual description of a construction defect.
29. The method of Claim 21, wherein the item of observational information includes a
photograph.
30. The method of Claim 21, wherein the observational identifier is a number.
31. The method of Claim 21, wherein associating, in the computer, the object
identifier to the observational identifier includes storing the object identifier and the
observational identifier in a relational database.
